Our Vision ...

Garrett County Memorial Hospital:

- Will be viewed as the provider of choice in the region and be recognized for our progressive personal service encompassing the full continuum of care.
- Will be known for our excellence across the region.
- Will continue as a community partner and resource, striving to proactively respond to the health and wellness needs of our region.
- Will provide a high level of community service and stewardship for the resources with which we have been entrusted.
- Will recruit and retain the most talented and caring employees through continuous efforts to be the employer of choice in the region through employee friendly programs and policies.
- Will collaborate and partner with other providers, as needed, to achieve our strategic direction.
- Will be characterized by cohesive leadership, efficiency, sound management, financial strength and a positive work environment.
- Will maintain a collaborative partnership between the Board of Governors, Medical Staff and Administration.
- Will strive to exceed the expectations of those we serve.
- Will be dedicated to the process never-ending improvement.
- Will be obvious in our expression and fulfillment of our charitable mission and community benefit.
- Will be dedicated to providing the best technological tools possible to assist our caregivers in providing the highest level of medical care achievable within our rural location.
Achieving excellence in healthcare is an on-going mission at Garrett County Memorial Hospital. Though tucked away in the beautiful mountains of Western Maryland, GCMH proudly compares and excels with healthcare facilities in much larger towns and cities throughout the country.

GCMH begins with a solid commitment to keeping abreast of technology by investing in new systems and devices which are proven aids to the medical staff and professionals who operate that equipment.

This brochure introduces you to the many doctors associated with our hospital and available to the community. They come from wide and varied backgrounds and educational institutions. Each is willing and anxious to work with you; you are encouraged to contact the individual doctor’s office for additional information and/or an appointment.

**Medical Specialties Defined**

**Audiology** is the branch of science that studies hearing, balance, and related disorders.

**Cardiology** is a medical specialty dealing with disorders of the heart.

**Chiropractic** includes the diagnosis, treatment, and prevention of disorders of the neuromusculoskeletal system and the effects of these disorders on general health.
**Dentistry** is the branch of medicine that is involved in the study, diagnosis, prevention, and treatment of diseases, disorders, and conditions of the oral cavity, the maxillofacial area and the adjacent and associated structures, and their impact on the human body.

**Dermatology** is the branch of medicine dealing with the skin and its diseases, a unique specialty with both medical and surgical aspects.

**Emergency Room Physicians** are available 24 hours every day to treat acute illness and accident victims, as well as, offer crisis intervention services for individuals experiencing severe emotional problems.

**Family Practitioners** provide both adult and pediatric medicine, orthopedics, psychiatric, obstetrics, preventive medicine, limited surgical procedures, emergency medicine and geriatrics.

**General Surgeons** provide endoscopic (gastroscopy, colonoscopy, bronchoscopy), laparoscopic (gallbladder removal and exploratory laparoscopy), cholecystectomy, major gynecologic surgery (abdominal and vaginal hysterectomy), general surgery including: colon resection, breast surgery and tubal ligation.

**Geriatrics** aims to promote health by preventing and treating diseases and disabilities in elderly people.

**Internal Medicine** includes primary care, endocrinology, rheumatology, oncology, gastroenterology, pulmonology, critical care medicine, cardiovascular disease and hematology.

**Obstetrics** is the medical specialty dealing with the care of all women’s reproductive tracts and their children during pregnancy, childbirth, and the postnatal period.
**Ophthalmology** includes outpatient/inpatient cataract surgery, in-office laser surgery and surgical diseases of the eye.

**Optometry** concerned with the health of the eyes and related structures, as well as visions, visual systems, and vision information processing.

**Oral Surgery** is a recognized international specialty in dentistry. It includes the diagnosis, surgical and related treatment of diseases, injuries and defects involving both the functional and esthetic aspects of the hard and soft tissues of the head, mouth, teeth, gums, jaws and neck.

**Orthodontics** is the first specialty of dentistry that is concerned with the study and treatment of malocclusions (improper bites), which may be a result of tooth irregularity, disproportionate jaw relationships, or both.

**Orthopedic Surgery** includes arthroscopy, joint replacements, joint reconstruction, trauma and sports injuries.

**Otolaryngology or ENT** (ear, nose, and throat) is the branch of medicine and surgery that specializes in the diagnosis and treatment of disorders of the head and neck.

**Pain Management** is a branch of medicine employing an interdisciplinary approach for easing the suffering and improving the quality of life of those living with pain.

**Pathology** is the branch of medicine that determines the essential nature of disease, especially of the structure and function changes of the body when caused by disease.
Podiatry is a branch of medicine devoted to the study and diagnosis, medical and surgical treatment of disorders of the foot, ankle and lower extremity.

Preventive Medicine Consists of measures taken to prevent diseases or injuries.

Psychiatry is the medical specialty devoted to the study, diagnosis, treatment, and prevention of mental disorders.

Psychology is an academic and applied discipline that involves the scientific study of mental functions and behaviors and has the immediate goal of understanding individuals and groups by both establishing general principles and researching specific cases.

Psychotherapy a general term referring to therapeutic interaction or treatment contracted between a trained professional and a client, patient, family, couple, or group. The problems addressed are psychological in nature and of no specific kind or degree, but rather depend on the specialty of the practitioner.

Radiology services include x-ray (diagnostic), nuclear medicine, mammography, ultrasound testing and angiography.

Urology is the medical and surgical specialty that focuses on the urinary tracts in males and females and on the reproductive system in males.

Wound Care the treatment of patients with acute and chronic wounds with evidence-based proactive as well as ostomy patients who have had some kind of bowel or bladder diversion.
